

Project Report Template

1 INTRODUCTION

1.1 Overview

A brief description about your project

1.2 Purpose

The use of this project. What can be achieved using this.

2 PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy Map

Paste the empathy map screenshot

2.2 Ideation & Brainstorming map

Paste the Ideation & brainstorming map screenshot

3 RESULT

Final findings (output) of the project along with screenshots.

4 ADVANTAGES & DISADVANTAGES

List of advantage and disadvantage of the proposed solution.

5 APPLICATIONS

The areas where this solution can be applied.

6 CONCLUSIONS

Conclusion summarizing the entire work and findings.

7 FUTURE SCOPE

Enhancements that can be made in the future.

8 APPENDIX

A.Source code

Attach the code for the solution built.

Project

Report Template

1 INTRODUCTION

1.1 Overview

In this project we analyze and visualize the emission of carbon dioxide in various countries and regions

Of from 1975 to 2020.

1.2 Purpose

Our project is useful for the countries to identify areas for improvement and take steps to reduce factors that are responsible for Co2 Emission for environmental sustainability.

2.PROBLEM DEFINITION &

DESIGN THINKING

2.1

Empathy Map

Template

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

STORY

4 ADVANTAGES & DISADVANTAGES

ADVANTAGES:

The result of this project helps the Researchers and Experiments experts to predict the global warming.

DISADVANTAGES

The data was taken from 1975 to 2020, current years are not included.

5 APPLICATIONS

This project gives a comprehensive detail to the researchers to easily know about emissions of Co₂ in India and other countries in future. It is also applied in industrial usage.

6 CONCLUSION

We analyze about the global Co₂ Emission it includes, Total World Co₂ Emission, Total Emission by Continents, Top 10 Emitting countries and Flaring Co₂ Emission. In this analyzation we control the Co₂ Emission.

7 FUTURE SCOPE

This project is useful for the researchers to analyze about the Emission of Co₂ in future use. I wish to develop the project to the next level by adding some features.
